DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a plastic pipe, classified in class 138, subclass 121.
 - II. Claims 7-11, drawn to a method of making a plastic pipe, classified in class 264, subclass 151.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups II and I are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process such as one not requiring the steps of extruding first and second streams of plastic into a mold to provide a the pipe with a multiple layer wall construction and forming a transition wall part which is removed to form first and second pipe sections.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **PATRICK F. BRINSON** whose telephone number is (703) 308-0111.
